Introduction

This guide describes the procedure for upgrading from Altify Insights 9.16 to 9.18.

If you are running an earlier version than 9.16, you should first upgrade to 9.16 with the assistance of the [appropriate Upgrade Guide](#).

Upgrade the Altify Core Package

To upgrade the Altify core package to the latest version:

1. Log into Salesforce.com with your administration username and password.
2. Copy the package URL into your browser's address field.

This URL is supplied by Altify.

For production Salesforce environments, the URL starts with:

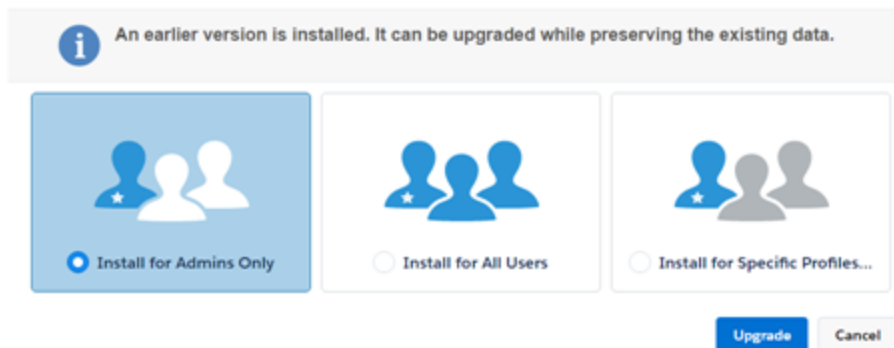

`https://login.salesforce.com/`

For sandbox environments, the URL starts with:

`https://test.salesforce.com/`

3. Select **Install for Admins Only**.

Note: Do not select any other option. This could corrupt user profiles during installation.

4. Click **Upgrade**.
5. Read the confirmation message and click **Done**. (If you see a message stating that the installation is taking a long time, don't worry. This is a normal part of the process.)
6. When the Installed Packages page opens, confirm that Altify 9.18 is installed in the org.

Upgrade the Altify Output Extension App

This section only applies if you have the Altify Output Extension App installed. This app is used to export to PowerPoint files, Microsoft Word, or Quip. If you have the Altify Output Extension app installed, you should ensure that you have the latest version, which is 1.36.3.

If a version of the Extension App is not already installed, the full installation procedure is required, rather than the steps in this upgrade guide.

See the [Altify Insights Installation Guide](#) to get details of the full procedure.

To check the number of your currently installed version, in **Setup** go to **Installed Packages** and note the version number.

If you already have v1.36.3, you can skip the steps described in this section.

To upgrade the Extension App:

1. Ensure that **Files Connect** is enabled in your org. The extension app can't install otherwise.

To enable it, go to **Setup > Files Connect**, and then select the **Enable Files Connect** checkbox.

2. Log into Salesforce.com with your administration username and password.
3. Copy and paste the Altify Output Extension App installation URL into the browser.

This URL is supplied by Altify.

For production Salesforce environments, the URL starts with the following:

```
https://login.salesforce.com/
```

For sandbox environments, the URL starts with:

```
https://test.salesforce.com/
```

4. The installation page opens. Select **Install for All Users**.

5. Click **Upgrade**.

When the installation is complete, a confirmation page is displayed.

Note: You can use an EU-hosted service for PowerPoint Export, rather than the normal USA-based service. (Typically, you would do this for GDPR reasons.)

Refreshing the Altify Permission Set

Following the upgrade, you must refresh the Altify Permission Set.

Note: We recommend that you do not make changes to the Altify Permission Set. However, if you have made changes, these will need to be reapplied after completing the following steps (as any edits are lost when the permission set is refreshed).

There are two ways to go about refreshing the permission set, a safer approach recommend by Altify ([refresh in sandbox before deploying to your production org](#)) and a quicker method that is not recommended ([refreshing directly in your production org](#)).

Refreshing in sandbox before deploying to production (Altify's recommended approach)

Altify strongly recommends that you perform this task in a sandbox environment before deploying a change set to your production org.

1. In your sandbox environment, search for and select **Altify Permission Set Administration** in the App Launcher menu.

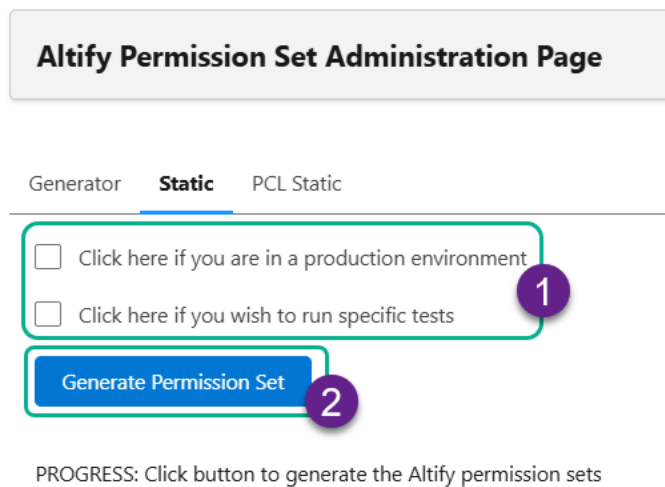

(In Classic mode, click the **All Tabs** button and select **Altify Permission Set Administration** in the displayed list.)

2. On the *Altify Permission Set Administration Page*, select the **Static** tab - as shown below.

Note: If your organization has enabled partner user access to Altify via a partner portal, you will need to regenerate the PCL Permission Set (**PCL Static**) also.

3. Clear the two check boxes that are displayed (see **1** below) and then click **Generate Permission Set** (**2**).

When that has completed successfully, you will see a confirmation message.

Caution: The create/update process can take a few minutes. Don't browse away from the page while the refresh is in progress.

4. Deploy the change set into your production org. For assistance, please see the [Salesforce Help](#).

Refreshing directly in production org (not recommended)

If you choose to refresh your permission set directly in your production org (i.e. not taking Altify's recommended approach described above), these are the steps you should take:

1. In your production environment, search for and select **Altify Permission Set Administration** in the App Launcher menu.

(In Classic mode, click the **All Tabs** button and select **Altify Permission Set Administration** in the displayed list.)

2. On the *Altify Permission Set Administration Page*, select the **Static** tab - as shown below.

Note: If your organization has enabled partner user access to Altify via a partner portal, you will need to regenerate the PCL Permission Set (**PCL Static**) also.

3. Select the two check boxes that are displayed (as shown in the example below):
 - **Click here if you are in a production environment**
 - **Click here if you wish to run specific tests**

Altify Permission Set Administration Page

Generator **Static** PCL Static

- Click here if you are in a production environment
- Click here if you wish to run specific tests

Classes

Enter the test classes you wish to run. One class per line

4. In the **Classes** text box, enter a test class - this is a validation step required by Salesforce.
5. Click **Generate Permission Set**.

Caution: The create/update process can take a few minutes. Don't browse away from the page while the refresh is in progress.

When that has completed successfully, you will see a confirmation message.

New Permanent Settings

A number of 'temporary' custom settings you may have been using in your previous version are replaced with 'permanent' custom settings when you install the upgrade package.

During the upgrade process, Altify automatically moves any values you had in the temporary settings to the new permanent settings (clearing the temporary settings in the process).

When upgrading from 9.16 to 9.18, the following temporary setting values are moved.

Altify Core Settings

- Temp1 is now *Include Partner License Users*

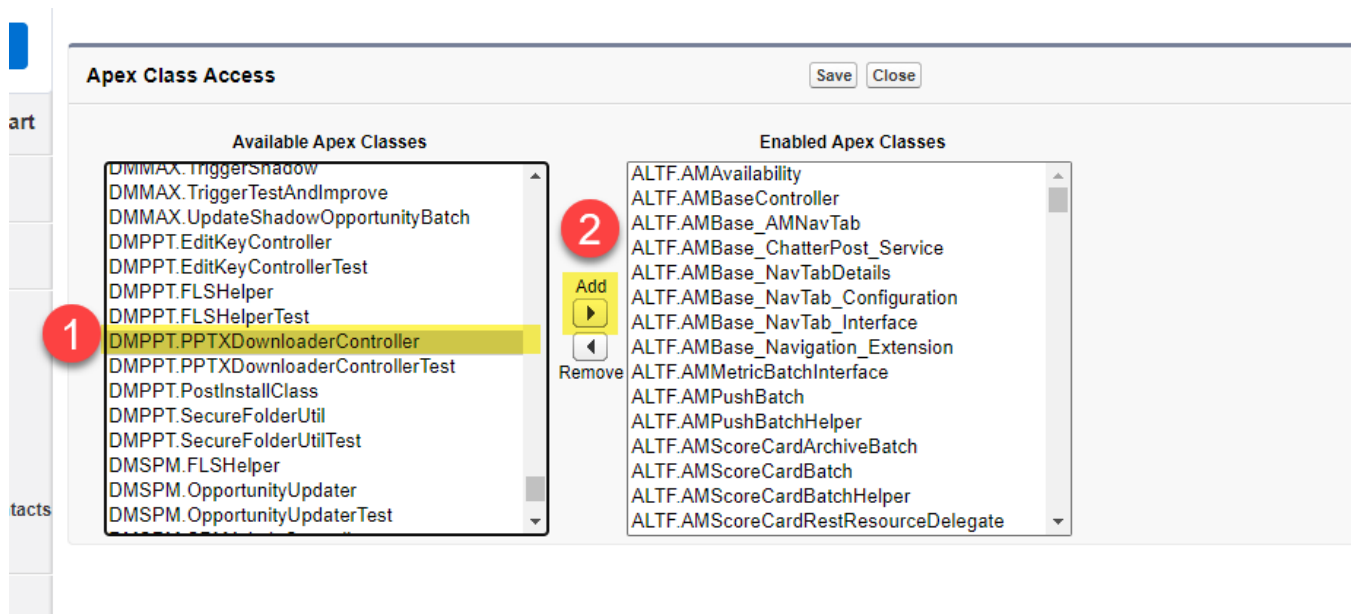

Enabling PowerPoint Export

If your org is licensed for the 'Altify Output Extension', you need to enable Altify to export to PowerPoint.

Note: The following may already be configured correctly in your org.

To configure the necessary permission, do the following:

1. In **Setup**, go to **Permission Sets**.
2. Click **Altify Permission Set**.
3. Click **Apex Class Access** in the Apps section.
4. Click the **Edit** button in the Apex Class Access section.
5. Find and select **DMPPT.PPTXDownloaderController** in Available Apex Classes (1) and click **Add** (2) to move it to Enabled Apex Classes.

6. Click **Save**.

Translating New and Updated Labels

Note: This topic applies only to customers who have translated Altify custom labels.

The Altify upgrade introduces a number of new custom labels, and updates the default English text of some others.

If you have previously translated Altify's custom labels into other languages, following the upgrade you'll need to translate the new labels and re-translate the updated ones.

The new labels include:

- Labels for new features.
- Labels that replace temporary 'placeholder' labels added in software patches.

Accompanying this release is a file that contains the new labels that have been added in this release (compared to the previous release).

Using the file, you can translate and import the new labels.

Please refer to the *Altify Localization Guide* for complete details about how to translate and import labels into your org.

Post Upgrade Checklist

Following your upgrade of Altify Insights, you can do the following to perform a quick sanity check of the product:

Updated fields on page layouts

Revisit the section [Update Page Layouts](#) and confirm that all relevant fields (you can ignore launchpads for the moment) are added or removed from page layouts as directed.

Account launchpad and functions

1. Create a test account record and ensure the *Altify Insights* launchpad is displaying correctly.
2. Click each tile, tab, button and link on the launchpad to ensure the pages load successfully.
3. Using your test account, create some simple test data for the account plan via the *Altify Insight* launchpad: [relationships](#) and [insights](#), and check to see that your test data is displayed correctly on the launchpad (as highlighted in the example below).

The screenshot shows the Altify Insights account launchpad. At the top, there's a header 'Altify Insights' with a user icon. Below it is a section titled 'Assess Your Current Position' which contains two summary cards: 'Relationships' and 'Insights'. The 'Relationships' card shows 2 Mentors, 13 Key Players, and 9 Non Supportive. The 'Insights' card shows 2 Goals Confirmed, 14 Key Player Insights, and 1 Initiative Confirmed. Below this is a 'Welcome' section with a 'Key Players' tab selected. The 'Key Players' section displays a table with columns: Contact, Support, Decision Orientation, Goals, Pressures, and Initiatives. The table contains four rows of data for different contacts.

Contact	Support	Decision Orientation	Goals	Pressures	Initiatives
Duncan Dredge VP Information Security	Supporter	Technical	Increase Rep Productivity Achieve 10% uplift in top-lin...	Market share dropping	
Ahmad Rishad SVP Product Developm...	Supporter	Business	Customer Engagement		Strategic Opportunity Mana... New sales methodology
Jean Winston VP Wireless Dev	Neutral	Technical			
Lisa Leung VP Broadcast Dev	Mentor	Technical	Achieve 10% uplift in top-lin...		

4. If you have installed our Altify Output Extension app, test the output by [exporting the account data](#).

Opportunity launchpads and functions

1. Create a test opportunity record and ensure the Altify launchpads (that your organization uses) are displaying correctly:
 - *Altify Insights*
 - *Key Players*
2. Click each tile, button and link on the launchpads to ensure the pages load successfully.
3. Using your test opportunity, create some simple test data on the [insight map](#) and [relationship map](#).
4. Check to see that the test data you have entered is reflected on the launchpads - as highlighted in the example below:

The screenshot shows the 'Key Players' table in the Altify Insights dashboard. The table has columns for CONTACT, SUPPORT, BUYING ROLE, GOALS, PRESSURES, and INITIATIVES. The data is as follows:

CONTACT	SUPPORT	BUYING ROLE	GOALS	PRESSURES	INITIATIVES
Charles Underwood President & CEO	Neutral	Approver	Grow revenue 15% in next 6 quarters		
Toni Wise VP Marketing	Mentor	User			
Mitch Brown Director Global Sales Operator	Mentor	Evaluator	Grow revenue 15% in next 6 quarters	Better Informed Buyers / Competiti...	Maximize Revenue in Key Accounts
Patti Miller SVP Operations	Supporter	Evaluator			
Clara Wilson EVP Global Sales	Neutral	Decision Maker		High Cost of Sales: CAC at 14 mont... Poor balanced rep performance - le...	Sales Process and Playbooks
Mark Garcia SVP Marketing	Enemy	User			

5. If you have installed our Altify Output Extension app, test the output by [exporting the opportunity data](#).

Altify Support

Need Assistance?

Altify Support is here to help! Contact us by emailing support@altify.com, or by logging in at [Altify's Freshdesk portal](#).

Standard support hours are 4:00 AM to 7:00 PM (U.S. Eastern Time), Monday-Friday. Support issues submitted after these hours will be addressed on the next business day.

After contacting Technical Support, what should I expect?

You will receive an email confirming your case has been created, along with the case number. Please use that case number when corresponding with Technical Support on any follow-up communications.

Response times

The following are our response times for each level of issue:

Priority Level	Definitions	Response Time	Commitments
Urgent (Outage)	Altify cloud service is unavailable.	1 hour (24 hours a day, 365 days a year)	<ul style="list-style-type: none"> Immediate and continuous. Hourly status updates.
Urgent (Business Critical)	<ul style="list-style-type: none"> Production system defect that prevents business critical work from being done and no workaround exists. Defect causes a material loss of data in the production system. Security-related defect. 	1 business hour	<ul style="list-style-type: none"> Immediate and continuous effort to resolve the defect or provide a workaround. Daily status updates until the defect is resolved or a workaround is provided.
High	<ul style="list-style-type: none"> Production system defect that prevents business critical work from being done and a workaround does exist. Defect violates the material specifications in the documentation and impacts your organization's production system. 	4 business hours	Altify will use reasonable efforts to resolve the defect as rapidly as practical, but no later than the next update after reproduction of the defect.
Normal	All other defects	1 business day	Defects will be addressed in Altify's normal update process.
